

INTELLIBRICKS PRESENTS...

LEGO ROBOTICS WINTER CAMP 2024

Program Description

LEGO® Robotics: Adventure Bots

Embark on an adventure with our Adventure Bots class, where students create Lego® models like Hang gliders, wakeboards, and Kayaks using motors and sensors for an introduction to robotics. They'll animate their builds through sophisticated Bluetooth technology and a child-friendly programming interface, all while learning about physics principles such as pulleys and gears. Materials are provided for use in small groups, but note that creations cannot be taken home; this program is not affiliated with the Lego® Group of companies.

INTELLIBRICKS LEGO ROBOTICS - WINTER CAMP
